

MONGOLIA INVESTMENT FORUM · LONDON · 15 SEPTEMBER 2026

Why Mongolia built its own AI

Foundational models, pre-trained in country. Deployed nationally.

Badral Sanlig – Founder, CEO of Egune AI

THE QUESTION

Develop, or depend?

Few nations pre-train their
own foundational models.

Mongolia is one of them.

Culturally-fluent Artificial Humans.

All models are pre-trained, not fine-tuned.

2008

Mongolian language AI

30 yrs

Digitised archive

4 - 70B

Parameters

> 10,000 hours

Speech corpus

What a nation cannot outsource.

Security

Records stay home.

Economic value

Capability compounds.

Data sovereignty

Citizens' own law.

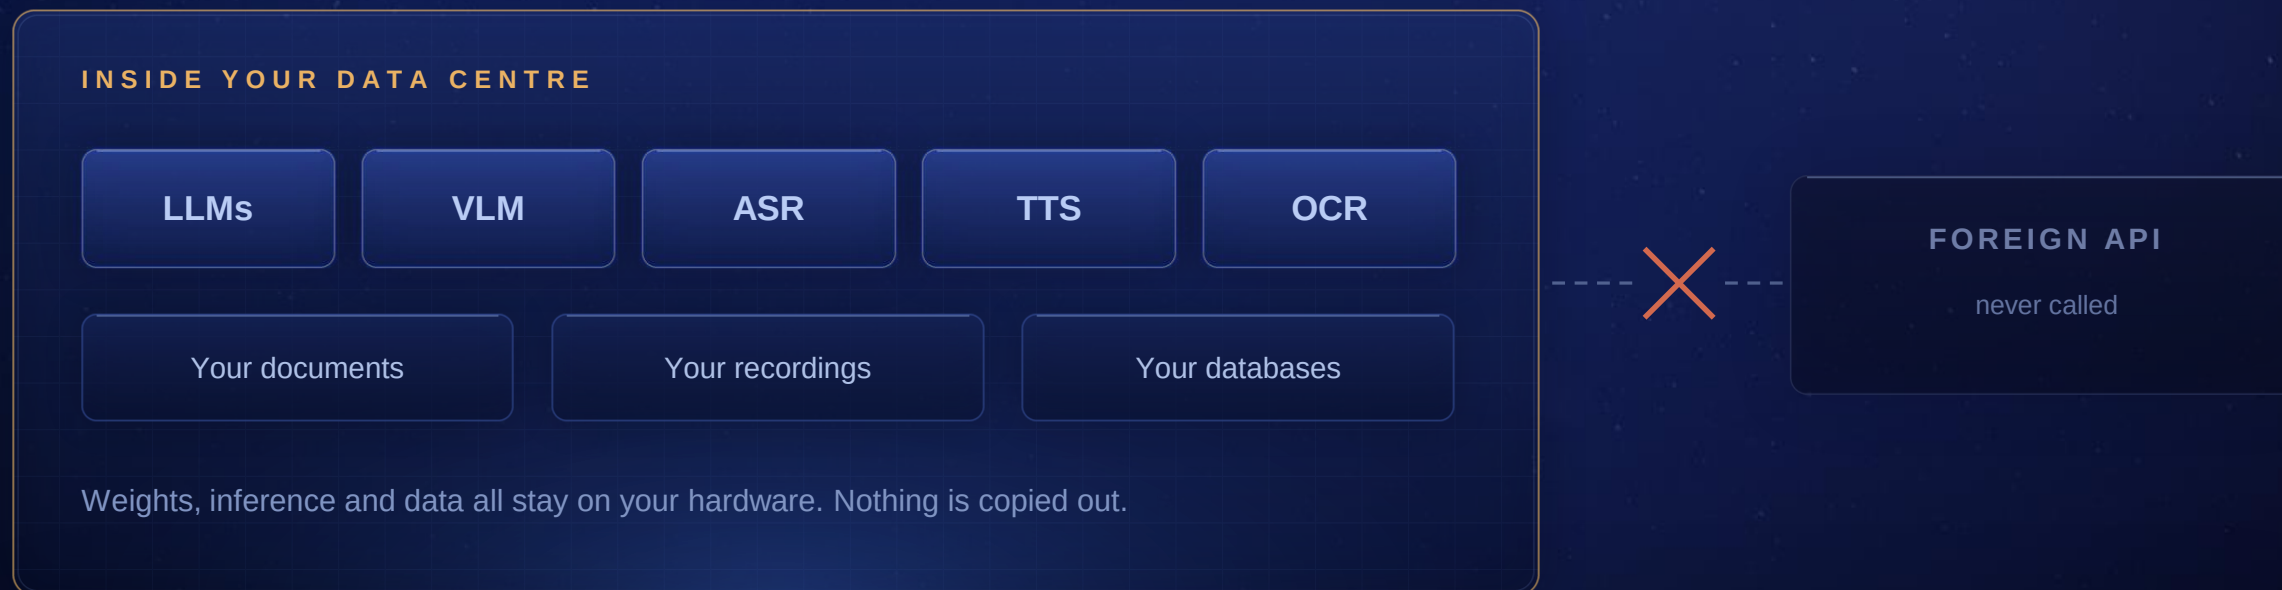

Language & culture

It must speak Mongolian.

Not one of these is a technology problem. Every one is a sovereignty problem.

Sovereign AI is not optional.

And it is not abstract. This is exactly how it ships.

On-premise

Deployed in your own data centre

Zero egress

No inference leaves your network

PDPL-compliant

Built to Mongolia's data protection law

Mongolian-native

Pre-trained on the language, not translated

Golomt Bank runs the full stack with no internet connection at all.

Mongolian runs on our models.

Fine-tuned for each domain.

Government

State institutions · World Bank · ADB

Enterprise

POWERED BY MONGOLIAN AI

A SMARTER
MONGOLIA
TOGETHER

Built once. Deployed anywhere.

Eighteen years of research, already done. What travels now is the know-how.

The models

The pre-training pipeline, ported to a new language.

The architecture

On-premise deployment, proven under state security rules.

The know-how

Eighteen years of building it, transferred with the build.

Any nation can own its intelligence. We have already proven how.

Let's scale together
